(54) Title: DEVICE AND ROTOR MEANS THEREFOR

(57) Abstract: The invention relates to rotor means (5) for centrifuging reaction vessels containing reaction mixtures in a device for asymmetric heating and cooling of reaction mixtures during centrifugation. The rotor means (5) comprise/s at least one fan blade (18), which force ambient gas to pass the reaction mixtures. The invention also relates to a device for asymmetric heating and cooling of reaction mixtures during centrifugation comprising said rotor means (5).
